## Manufacturing Engineer

### Principle Duties and Responsibilities:

- Insure the manufacturability of new products, and projecting startup and production costs.
- Design and implement lean manufacturing techniques.
- Use a structured, analytical engineering approach to solve chronic, complex process and product problems.
- Evaluate and improve assembly methods, tooling and test equipment to reduce cost of key components, products and processes.
- Prepare cost estimates for production hardware used to develop sale prices to customer.
- Identify, justify, purchase, and incorporate new capital equipment.
- Work with Design Engineering and outside vendors to identify, evaluate, and incorporate new processes/technology into new and existing designs.
- Develop time standards for production operations.
- Develop, prepare and implement manufacturing floor layouts.

### Qualifications (Educational/Experience):

- BS Degree in Mechanical, Manufacturing or Aeronautical Engineering.
- Experience performing engineering duties in a Manufacturing setting is required.
- Lean & Six Sigma training and experience is highly desirable.
- Regulations require applicants be permanent residents or citizens of the United States.
- A working knowledge of: Design for Manufacturability (DFM) practices, Statistical Process Control (SPC), Pro/Engineer and Pro/Manufacturing, Geometric Dimensioning and Tolerancing.

### Compensation/Benefits:

- Health, dental, vision, and life insurance
- 401K
- Education assistance
- Flex hours
- 15 paid holidays
- Fitness Center
- Business casual dress, and more.
