## Extend your capabilities to perform overhaul and maintenance with support equipment from Carleton Life Support Systems

Carleton Life Support offers a complete line of support equipment for Operational, Intermediate and Depot level overhaul and maintenance of the F-16 OBOGS system. For operators who desire to have in-house maintenance capabilities, Carleton Life Support offers on-site training, field support and spare parts to meet these needs.

The state of the art test sets and test stands aide the operator in trouble shooting and maintenance from the operational level through the depot level.

### Test Equipment Features

- Portable on-aircraft test sets at Operational Level
- Functional tests at Operational and Intermediate Levels
- Leakage at all Levels
- Electrical at all Levels
- Acceptance tests at Depot Level

### In-house repair and maintenance benefits

Utilizing support equipment from Carleton Life Support Systems allows the operator to perform on-aircraft maintenance/testing, I-level testing/repair, and in country depot level repairs/overhauls of the F-16 OBOGS system components. Having complete F-16 OBOGS system maintenance capability affords the operator the ability to improve maintenance schedule control, reduce maintenance turnaround time, reduce costs, and increase maintenance system reliability. Complete system maintenance capability will extend the service life of the F-16 OBOGS system.
